

SHANYA JAIN

Professional Summary

Skills Profile

Technical

Operating System	Windows, Unix
Environment	- Operating Systems: UNIX - Data Warehousing: Snowflake - ETL Tools: Informatica Power Center, IICS
Database	Oracle SQL
Internal Tools	Snowflake Data Warehouse
Languages	Java, Python
Other	Data Warehousing Concepts, ETL Concepts, Data Modeling, Unix, Concepts of Software Engineering.

Functional

Management and Leadership Skills	- Understanding of project management, scheduling and strategic planning concepts. Teamwork: Collaborated with peers during training. Problem Solving: Applied technical skills to solve real world problems. Communication: Polite, Courteous, professionally groomed.
Training & Development	Collaborated effectively with team members to deliver project tasks using tools such as Informatica, Snowflake and Oracle SQL. - Eager to apply the technical skills learned during training to real world projects.

Professional Experience

RESTAURANT ANALYSIS Informatica Developer

JULY 2025

A data integration project focused on analysing historical sales data from multiple restaurant outlets. The goal was to perform **data cleaning** and **transformation** of source data, build **ETL workflows**, and generate visual insights to support strategic business decisions.

SHANYA JAIN

- **Informatica Cloud / PowerCenter** – Conducted data cleaning and transformation, including handling missing values and resolving datatype inconsistencies (e.g., replacing string "null" in numeric fields with default values).
- **ETL Workflow** – Designed and implemented a **star schema** with dimension tables (**Dim_Hotel**, **Dim_City**, **Dim_Speciality**) and a central fact table (**Fact_Hotel**) to store transformed and structured data.
- **Environment** – Informatica Cloud/PowerCenter, Snowflake, Oracle SQL Database, CSV Source file.

Summary of Projects

RESTAURANT ANALYSIS

JULY 2025

Informatica Developer

- To develop an **ETL setup** for restaurant data using **Informatica Power Centre**.
- Offers hotel choices in various cities based on ratings across different criteria.
- Analyzes customer behavior and preferences to help maximize profits.

Training and Seminars

Capgemini Training – A4 Analyst / Software Engineer

- Completed training and program covering **Data Warehousing**, **ETL processes**, Software Engineering, **Unix** and **Oracle database**.
- Worked on a team project during training, gained hands-on experience in **Data Cleansing** and building **real-time data pipelines**.
- Completed **Power Skill** Foundation training focusing on soft skills and **presentation skills**.

Education

Lakshmi Narain College of Technology

Bachelor Of Technology (IT), **CGPA: 8.46**
